Lab 9—Introduction to C++ Programming

Objectives

Learn the C++ compiler tools.

Learn the basic `cin` and `cout` commands in C++.

Part 1

Write a program to take in your name as input from the console or terminal and print it out.

Input

Bob

Output

Hello Bob !

Instructions

You should use some text editor (geany, vi, gedit, etc.) to write your program. Do not use any IDE like CodeBlocks for this program.

Name your program Lab9.cc

Zip and submit

To get credit for this lab exercise:

Submit your code to Moodle as a zip file named Firstname_Lastname_Lab9.zip

Show the TA your code and run your program.
